## VENUEDETAILS

### Course Length:

320m

### Flow rate:

15 m<sup>3</sup> /sec.

Mountain Canoeing Track at ul. Kolna 2 in Krakow is the only facility of this type in Poland! At the length of 320 meters, there are adjustable water figures with the possibility of modification, causing the damming up of water at the flow level of 15 m<sup>3</sup> / sec. For its construction, the City Hall received a distinction for the implementation of a perfectly designed and strategically constructed sports facility in 2003. The facility serves as the Continental Training Center in Slalom Canoeing under the patronage of ICF and the Olympic Preparation Center of the Polish Canoe Association. From autumn to spring, the track has a 200-meter roof with a heating system and lighting. It is the only solution of this type in the world that enables training in extreme conditions of flowing water during this period.
